Understanding Silicon Valley and Startup Ecosystems: New research and academic classics you should know

Speakers

Kenji E. Kushida, Research Associate, Shorenstein APARC Japan Program, Stanford Silicon Valley - New Japan Project leader

Kanetaka Maki, Research Associate, Shorenstein APARC Japan Program

Kenji Kushida will provide an overview of canonical works of Silicon Valley, including work of Martin Kenney and his classic co-edited volume "Understanding Silicon Valley" and other more recent work drawn from the Stanford Silicon Valley - New Japan project's "Top Ten Reading List of Silicon Valley." He will also share insights from a recent report co-authored with Richard Dasher, Nobuyuki Harada, Takeo Hoshi, and Tetsuji Okazaki entitled "Institutional Foundations for Growth" which partially draws from research on Silicon Valley.

Kanetaka Maki will present his new research from a paper entitled "Milestones to University-Based Startup Success: What Is the Impact of Academic Inventor Involvement?" Based on the data analysis of 533 University of California startups, he will explain the impact of inventor involvement in the growth and success of university-based startups.

Wednesday December 2, 2015

4:30pm-6:00pm (doors open 4:15pm)
Philippines Conference Room, 3rd floor Encina Hall
616 Serra Street, Stanford University

RSVP REQUIRED
Register to attend at http://stanford.svnj.org/forum

Presented by
Japan Program at the Shorenstein Asia-Pacific Research Center (APARC), and
US-Japan Technology Management Center (US-ATMC)
